Getting started with Howmuch

Howmuch How to Document

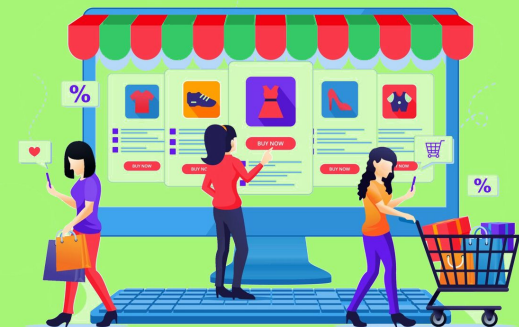

Exceptional business growth through fast, reliable, and innovative POS technology

History Of The Retail Business

From starting with a bartering system to selling products in-store, the retail business experienced a vast ray of advancement with time. This continuous growth leads to a new trend of online selling and webshops that gives retailers a new way. There were mom-and-pop stores in the 18th century where the family-owned independent retail businesses sold only one particular item like groceries, drugs, fabrics, toys, tools, and general merchandise items for daily usage. Later on, in the late 19th century and early 20th century, the concept of available stores emerged that dramatically brought a new trend in economic and business activities and opened new doors for new jobs and new ways of living. These general stores don't just sell products and services but also provide entertainment events to appeal to customers so that they buy more products today. These activities are reshaped as promotions, coupons, and sales that provoke the customers to shop more.

With time, new inventions emerged and became part of the retail business as the first cash register was invented in 1883, made up of metal tap and simple mechanics that record sales. We are using these cash registers but in a highly advanced form with more functionalities such as Point of Sale software that not only keeps track of the inventory, sales, customers but also manages multiple business operations and keeps businesses aligned. In the mid-'90s, the shopping malls emerged to provide a central location where customers could easily shop from numerous retailers under one roof. Finally, in the late 1990s, the idea of e-commerce emerged as more and more people had access to digital technology, so they felt more convenient with online shopping.

The current marketing statistics highlighted that around 90% of businesses use social media sites for marketing their business to catch online customers. Similarly, the growth of online retail stores is elevating, and businesses are thriving to keep up with the latest trends. The research highlighted that 67% of millennials preferred to shop online compared to visiting in-store. Therefore setting an online business presence is as essential as having an in-store shop.

Retail Market Business

As discussed above, the retail industry experiences up-gradation over time. At the same time, lifestyles and consumer behavior of shopping are also changing. Previously customers preferred to shop in-store now, and their busy lifestyle pushed them to shop online. According to the 2018 retail sales statistics, online retail store sales hit \$6 trillion. Additionally, global retail sales are expected to grow more in the coming years. The successful brick-and-mortar stores are using both ways, i.e., online and in-store presence, to attract more clients.

The Conventional Approach To Do Retail Business

If you want to expand your business, then it is better to improve the overall performance of your business. Then, it is suggested to follow the latest trends by expanding online, improving your store's online presence, and maintaining a better sync between online and offline channels. E-commerce has made itself a positive experience for customers. If your business gives your customers ease to shop online and offline with better facilities, cloud-based POS software will be the best conventional approach. Similarly, the retail inventory method for doing business is also a conventional approach for your business. The good thing about the retail inventory method is that a Point of Sale software retains the capability to automatically track inventory, sales, customers, profit, and sales.

Retail Traps That Affect Business

Many environmental factors are the variables that affect retail business operations. The business needs to consider these pitfalls and risks and avoid them when operating its business. Some of the prominent retail traps are highlighted below:

- Have less knowledge regarding the latest business trends.
- Not choosing the correct location or making your business accessible to customers.
- Not investing in building a well-thought business plan and not sticking with the business plans.
- Poor management of suppliers, staff, cash flow, inventory.
- Not having a business presence on the website.
- Not maintaining professional contacts and expanding your network towards experts.

BENEFITS OF USING POS

To avoid the retail traps and environmental factors that impact the business performance, using POS software will be an ideal choice. Especially the cloud-based Point of Sale software solution like Howmuch POS. No doubt, a POS simplifies many complex retail operations and makes it easier for managers to carry out their functions more conveniently. Many compelling reasons prove to be beneficial for you to use POS. Some of the significant benefits of using How Much POS are given below:

- It manages your inventory in real-time and keeps track of every single item, and maintains optimal amounts of stock in your inventory to minimize losses.
- Howmuch POS simplify invoicing and record all the purchase details, sales, service charges, tax, description of goods, transaction value, and every information.
- It makes your sales and payments better and faster by accepting multiple payments and making it easier for the customers to complete transactions conveniently.
- With Howmuch POS you can manage customers more appropriately and incentivize them to visit your store more often.
- Howmuch POS increases the revenue of your business by properly managing purchases from suppliers. It keeps everything in place and maintains a vital check on most essential and least essential products.
- One of the best functionality in Which POS that will optimize revenue is its cross-selling features that offer relatable items to the customer when shopping. Hence, it increases customer experience and business revenue.
- Howmuch POS increases customer loyalty and service by offering customers fast, innovative, and reliable service to meet their expectations, reducing the risk of losing customers.
- The best thing about the Howmuch point of sale solution is that it is highly reliable and secure, and it backs up all the data in its cloud storage. It eliminates the threat of data loss or breaching.

Getting started with Howmuch

Howmuch POS is a software where you can run sales, print receipts, maintain optimum customer care standards, manage your inventory effectively and perform other points of sales operations efficiently. It is specifically designed to improve small business owners' lives. Get yourself registered with Howmuch POS and enjoy all the features of Howmuch POS. Advanced Business Reporting				

After setting up your foodnerd account, you'll be required to create a store on howmuch.

There are four different steps: in-store creation, i.e., Create a store> Add Products> Set up shipping and payment> go live.

Fill up the form with the required information.

Write> Store Name,

Write> Store Description,

Enter> Email Address,

Upload> Store image,

Enter>Store Domain,

Select> Store Category then scroll down more and

Enter> Store Cover Photo, Add Store Address,

Select> Country,

Choose> City,

Enter> Contact Number.

If you want to receive alerts on WhatsApp, tap the option to mark Yes or No.

How to Create a Store with Howmuch POS?

Adding products to your store is the next step after store creation

Just click> Add products to your store.

Two options will appear, Add products manually or Import your products.

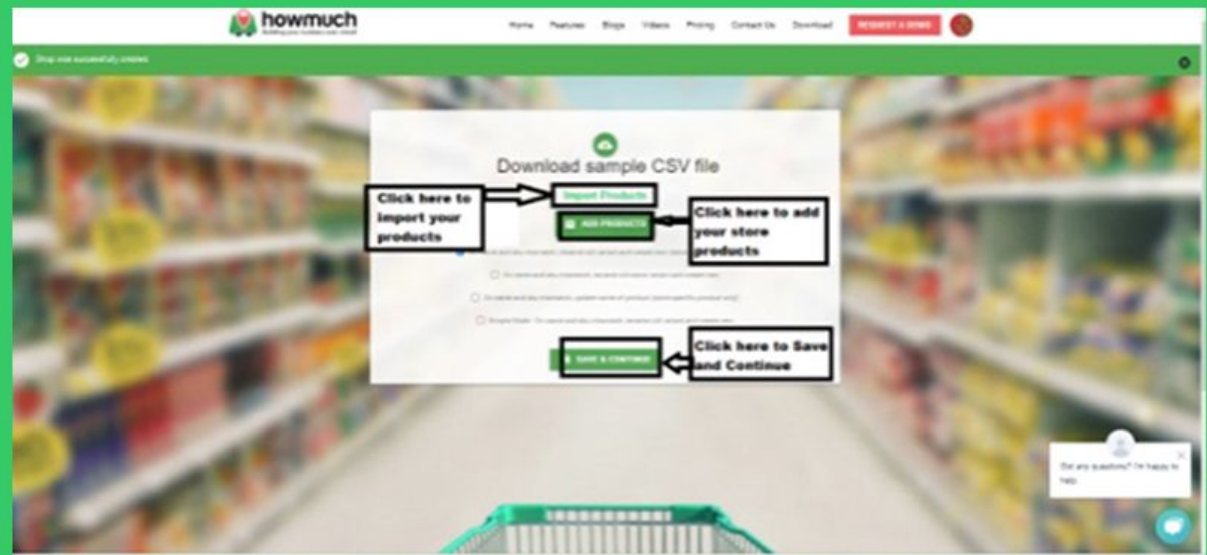

If you want to add your products manually,

Tap> Add products.

If you want to import your products information,

Tap> import products.

Click> Save and Continue to proceed further.

How to Add Products to your Store?

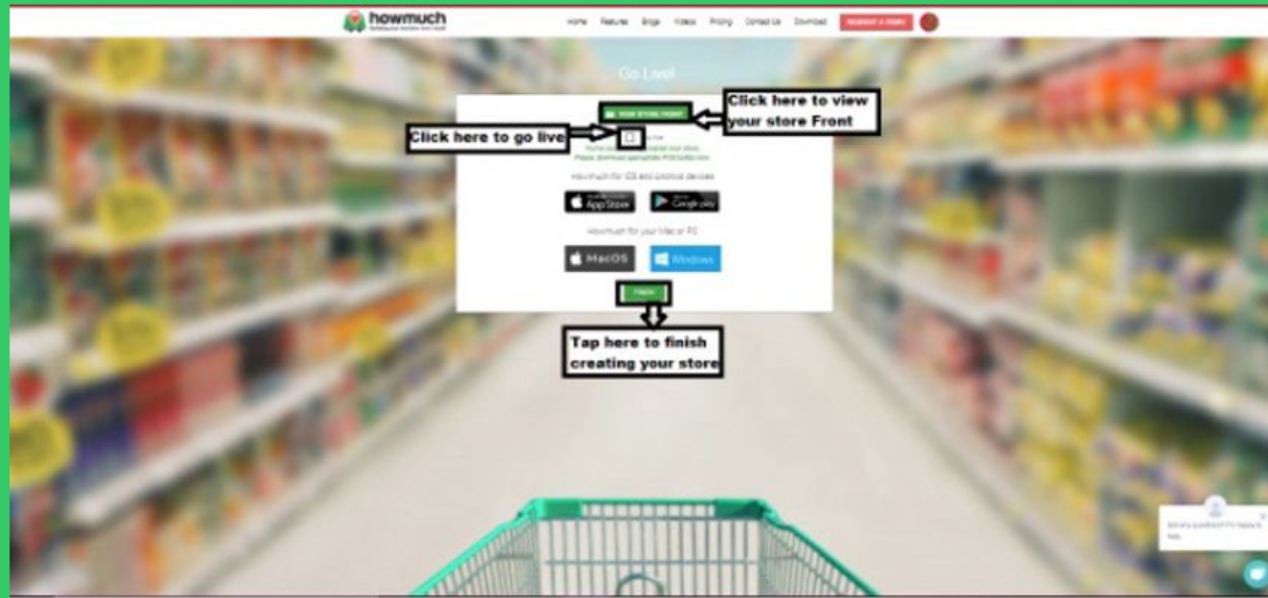

Shipping and payment configuration is the next step that will appear after adding products to your store. Fill up the required shipping and configuration details. Such as **Store Name**> **Delivery Charges**> **Shipping Charges**> **Maximum Distance**> **Weekly Time**> **Payment Configuration** etc. Put Delivery charges, Minimum Delivery Order, Shipping Charges, and Max Distance. There is also a switching option, which gives you two options; **Delivery Radius** and **Delivery Polygon**. In the Payment Configuration section, there are multiple options to choose from. Such as **Cash**, **Zambia Mig Gateway**, **Credit Card** and **Easy Paisa**, **Credit Card UBL**), **Bank Deposit**, and **Stripe**. Mark the option according to your requirements. Tap>**Save & Continue** to proceed further.

How to Setup Shipping and Payment?

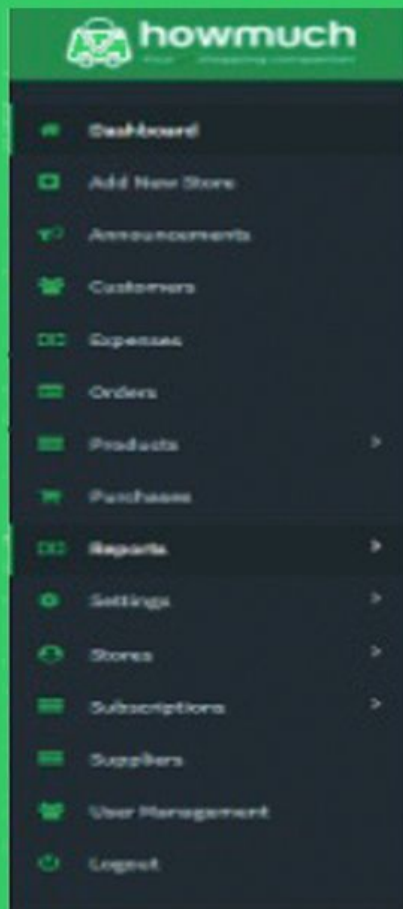

After you press continue, your store will be successfully created.
The next step requires you to go live.
Before going to live, first, view your storefront, i.e., how it appears to others.
Tap> view storefront to see.
Mark> Go live option.
Tap> Finish to complete your store creation process
Add purchases, and that's it.

How to Setup Shipping and Payment?

There are different options available in the side drawer, allowing the user to perform multiple tasks. See the image below:

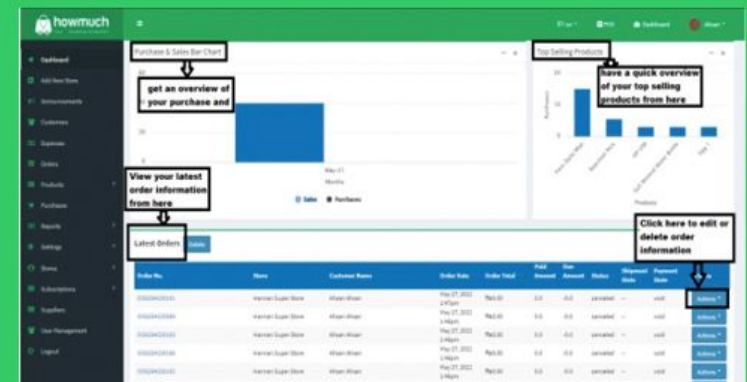

Now we will briefly elaborate on how to utilize these features:
Dashboard :

With dashboard User will be able to have a quick overview of its store details. Users can also see their current purchase and sales and can quickly locate their store's order history.

Click > Dashboard in the side drawer and you'll be redirected to the Dashboard of your store.

Have an overall view of your store at one place and see the below screenshots for detailed information.

How to use Howmuch POS Admin Side Drawer Features?

To add Store,
Click> Add New Store tab, located inside the side drawer and below the dashboard tab, and you'll be redirected to the **“Add Store”** page.

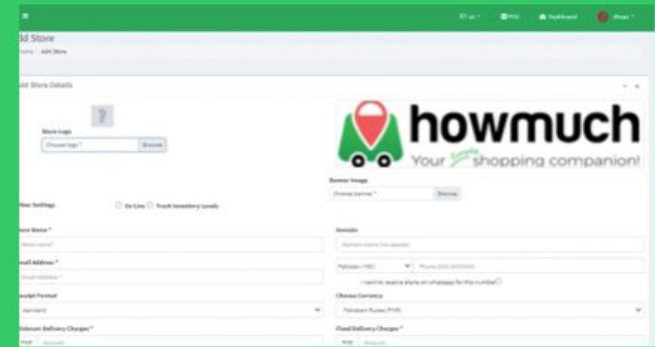

A form will appear as shown below. Enter all the required information including

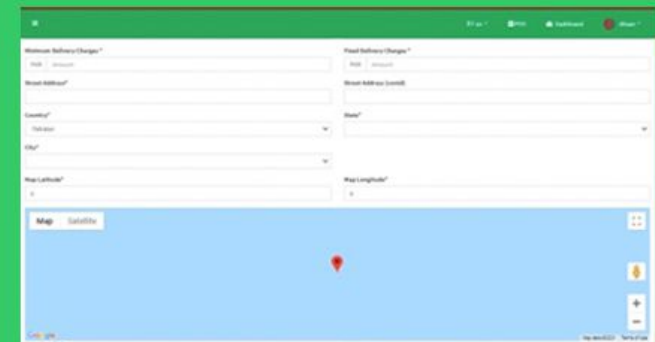

A screenshot of the 'Add Store' form with several callout boxes. One box points to the 'Add store description here' field. Another box points to the 'Set store weekly schedule from here' section. A third box points to the 'Tap here to create store' button at the bottom left.

Store Logo> Store Name> Email Address> Receipt Format> Minimum delivery charges> Store Domain> Phone Number > Choose currency> Enter delivery charges > Store Address> Country and City> Add store description> Set store schedule.

Set timings and store details and Press > Create Store to further proceed

A screenshot of the 'Add Store' form. The form includes fields for 'Store Logo', 'Store Name', 'Email Address', 'Receipt Format', 'Minimum delivery charges', 'Store Domain', 'Phone Number', 'Choose currency', 'Enter delivery charges', 'Store Address', 'Country and City', 'Add store description', and 'Set store schedule'. The 'howmuch' logo is visible at the top right.

A screenshot of the 'Add Store' form showing the 'Minimum delivery charges' and 'Receipt delivery charges' sections. Below these sections is a map with a red location pin.

Add Store

To create an announcement,
Navigate to > the Announcement feature
in the side drawer.

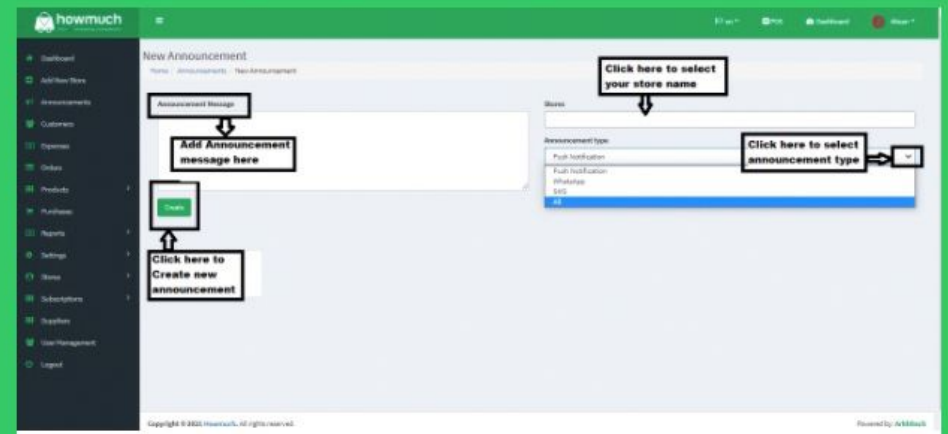

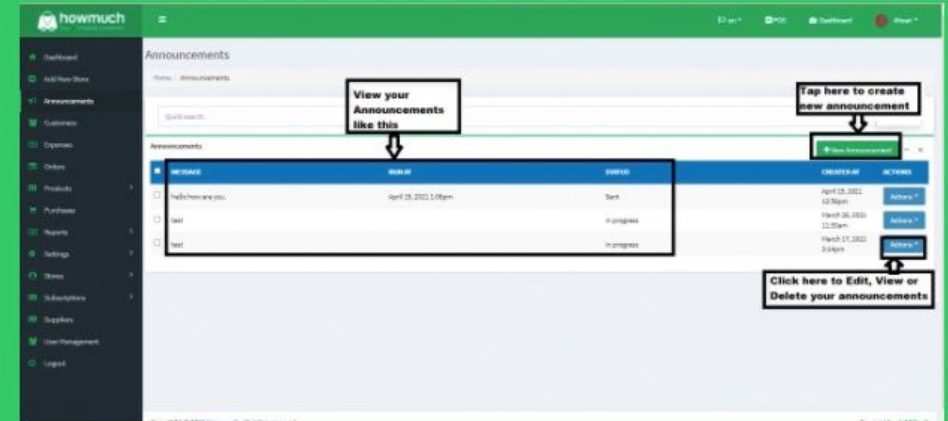

A page will appear where you can view your
previous announcements or create any new
one.

Tap> New Announcement

A form will appear and enter details such as
Announcement Message

Select> Store> Select Announcement type

**Tap> Create to create a new
announcement.**

Announcements

User can view their customer details under this section

To view, Customer details navigate to the Customers option, and you'll be redirected to the customer page, where you can view your customer details such as Customer Name> Store Name> Email > Sale Due> Return Due> verification and category as highlighted in the image below.

Users can also use the filter option to get details of any specific customer.

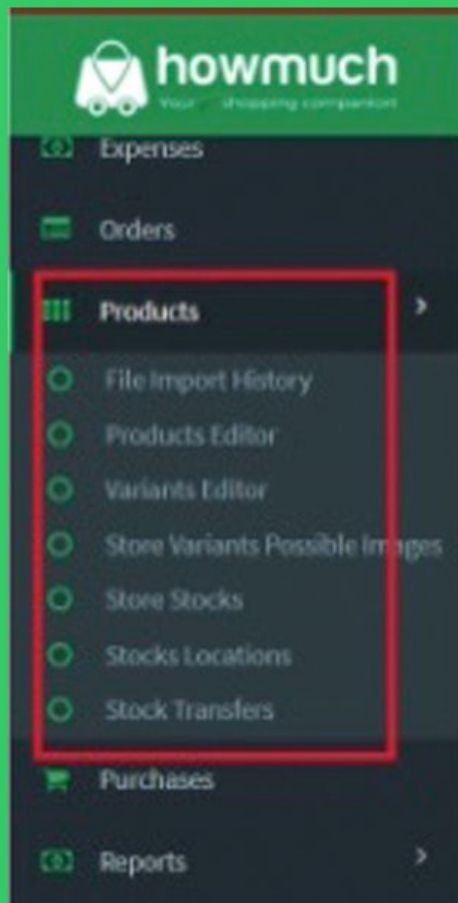

The screenshot shows the 'howmuch' web application interface. The top navigation bar includes the 'howmuch' logo, a hamburger menu icon, and user information. The left sidebar contains a menu with options like Dashboard, Add New Store, Announcements, Customers, Expenses, Orders, Products, Purchases, Reports, Settings, Store, Subscriptions, Suppliers, User Management, and Logout. The main content area is titled 'Customers' and shows a list of customer records. A search bar and a 'FILTER' button are located above the table.
