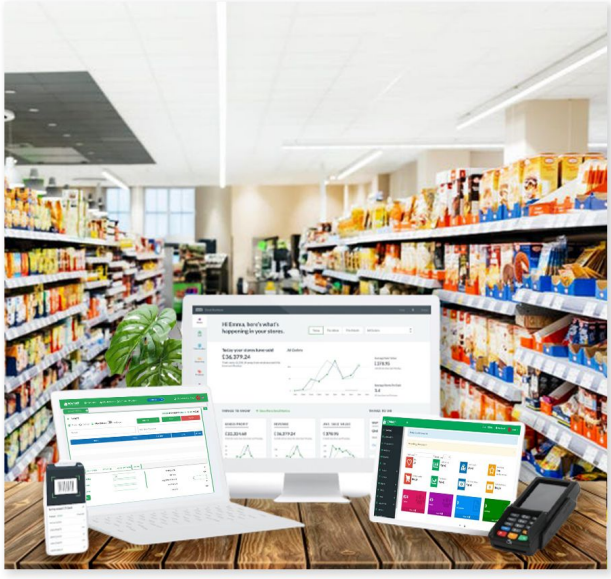
ABOUT HOWMUCH?



Howmuch Pvt. Ltd. was established in 2014 by the CEO, Mr. Hisham Malik, with the aim of providing a competitive range of retail point of sale and supply management solutions. Howmuch has its expertise in providing the perfect customized POS (Point of Sale), B2B, B2C, Distributors, Suppliers and Warehouse solutions for all SMEs & MSMEs through online & offline services. Howmuch has 300+ satisfied clients, 1000+ active users, and over 20,000 orders totaling USD 50,000 are processed through Howmuch on a daily basis. We have offices in all major cities of Pakistan (Lahore, Karachi, and Islamabad) and in KSA (the Kingdom of Saudi Arabia) as a foreign-owned company (CR No. 684936), UK, UAE (Dubai) and Egypt.

Howmuch provides retailers everything they need to launch, market, sell, and manage their businesses. Howmuch offers all-inclusive solutions that assist all businesses in managing operations, engaging with customers, accepting payments, and expanding their operations.

Howmuch topnotch award-winning retail store management and point of sale software solution catering to the needs of the classic and modern stores. It's a complete end-to-end solution that brings retailers into the age of cloud through the web, mobile (iOS, Android), and desktop (Windows, Mac) applications.

HISHAM MALIK
CEO

CEO INTRODUCTION

The CEO of Howmuch, Mr. Hisham Malik, is a Georgia Tech graduate with 17+ years of experience in the USA and Pakistan delivering high-end web, mobile, e-commerce, and social networking products successfully across leading companies. He launched an award-winning SMS-based social networking platform in 2008. He led the Pakwheels Initiative in 2009, and in 2018, he directed and launched Robson.ai. Under his leadership, Howmuch successfully drives towards comprehensive growth in the technological industry. He has raised the company's strength within a limited period of more than 8 years.

MISSION

Our mission is to become the first choice for all retailers and customers by providing them with the most advanced, cutting edge, and affordable solutions that meet customers' expectations for service, quality, and value.

VISION

The vision of Howmuch states, "We strive to be recognized as ideal in providing perfect customized POS (Point of Sale), B2B, B2C, distributors, suppliers, and warehouse solutions. We want to digitalize the retail industry for today and tomorrow. Our goal is to make it easier for shop owners to manage their store operations and to provide customers with a convenient shopping experience while shopping, ultimately accelerating business growth."

OUR VALUES

Howmuch has been a forward-thinking, dependable software company dedicated to core values since 2016.

1. We value entrepreneurs and think it's wise to take calculated risks.
2. We are committed to delivering quality products and services right on time.
3. We strive to do everything with passion and commitment.
4. We think innovatively and find solutions to challenges.
5. We emphasize maintaining a culture of innovation that fosters positive connections and elevates productivity.

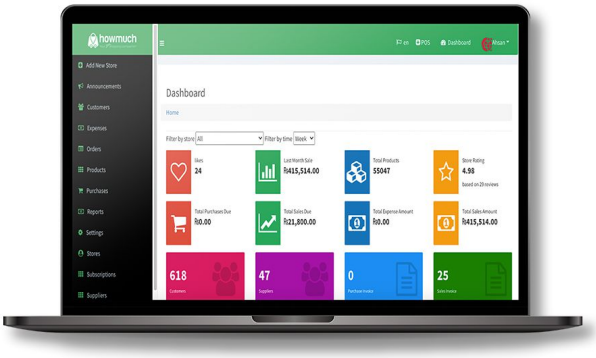
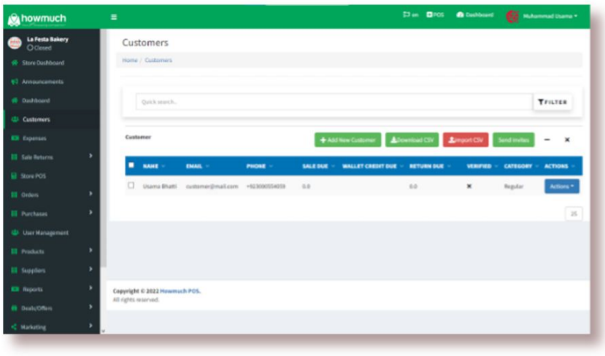
1. HOWMUCH WEB DASHBOARD

Howmuch POS web interface is the manager side that can be accessed from your internet browser. It is built to help you manage, optimize, and grow your business. It does more than just process the orders. It is filled with outstanding features that are mentioned below in detail:



Customer Management



Manage your customer database with intuitive customer management software i.e. Howmuch because it allows users to design your sales process to be more customer-focused.
It automatically saves and tracks customers during in-store and online checkout.

Customer Loyalty Program
Howmuch encourage repeat business, and increase shopper spending with a custom loyalty program.
It saves customer information during checkout and builds a customer database.

Create Customer Profiles
In Howmuch customer details are automatically stored under their profile, where users can view their purchase history, loyalty, and account balances.

Import Customer
Once users build their customer database. They can easily bring those contacts over to Howmuch with a simple CSV upload.

Supplier Management

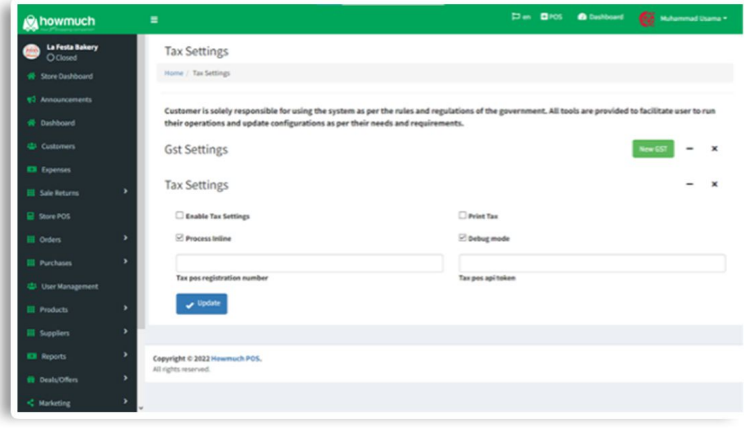
Howmuch improves the interaction with third-party vendors. It provides excellent service to users regarding supplier management, keeps track of suppliers' ledger, including expenses and dues, and makes inventory and the warehouse more aligned.

Supplier Record
Howmuch maintains supplier efficiency by staying in touch with suppliers. It keeps check of supplier data, including suppliers catalog, purchases, sales, stock control, finance reports etc.

Improved Performance
Howmuch provides detailed supplier reports in order to let users know which suppliers' products are selling best. It simplifies the conversation between your store manager and suppliers.

Seamless Management
With Howmuch POS supplier management, users can easily manage bulk of supplier data with a few clicks, and they can also add, edit, and delete suppliers easily.

Compliance With Tax Authorities



Howmuch comply with all the tax authorities, most prominently with ZATCA (KSA) and FBR (Pakistan).
It is authorized software that complies with all tax and customer authority legal obligations. No matter in which region you are operating Howmuch, apply the rules of transactions based on your country's criteria.

Generate Receipts In Custom Format
Howmuch quickly generates XML invoices according to the tax and customs authority format. It helps the user stay compliant with all the rules and adapt to tax authority regulations.

Invoices
It generates invoices for various transactions, including sales, refunds, voids, etc., in Arabic and English with QR codes and hash values such as the Universally Unique Identifier (UUID).

Authorized Receipts
Howmuch also generates the authorized receipts that will eliminate the skepticism among customers about whether the sales tax is officially approved or not.

Credit Management For Customers and Suppliers

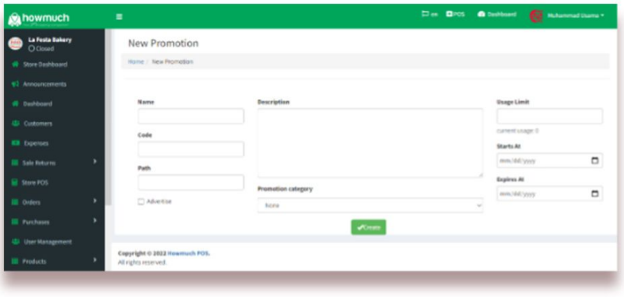
Howmuch Point of sale software makes customers more loyal to your store than your competitors. It provides credit management facilities that enable retailers to easily manage, update, and track credit balances, pay orders, and bills of customers and suppliers. Howmuch also has a feature of paying and accepting payment partially and fully.

Pay Later Functionality
Howmuch POS is equipped with "pay later" functionality that keeps track of customer and supplier dues and gives them leeway to accept remaining payments later on.

Customer Loyalty
Howmuch POS continuously draws customers' attention to your business, resulting in increased productivity and customer satisfaction.

Easy Credit Management
Howmuch credit management system manages the credit balance, pay orders, and bills. It also supports multiple payment gateways.

Marketing Tools

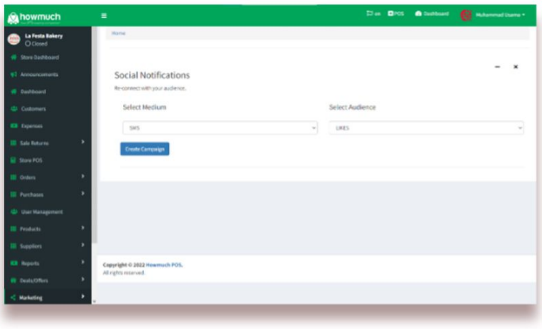


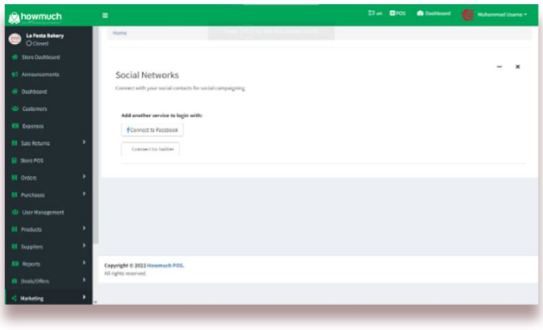
Howmuch POS has in-built marketing tools available that increase the visibility of your products and elevate customer loyalty.
Howmuch makes your business' marketing and promotion become more manageable than ever.
It saves customer data in its CRM and updates customers every time there is a new sale, offer, or promotion.

Digital Marketing Tools
Howmuch is equipped with digital marketing tools.
It allows users to send promotional offers, emails, newsletters, SMS, notifications, and discount coupons and engage customers.

Marketing Campaigns
Howmuch is loaded with wonderful features, including automatically creating loyalty rewards. It efficiently manages the marketing campaigns of customers.

Generates Loyalty Rewards
Howmuch POS artificial intelligence generates loyalty rewards for the store's loyal customers and makes them feel more appreciated and valuable for continuously shopping.





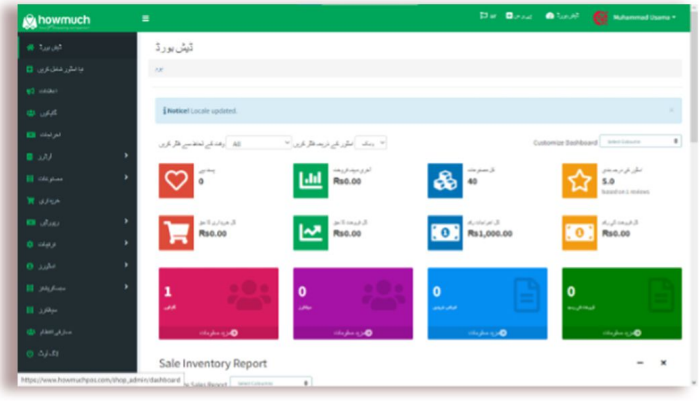
Multiple Languages Support

One of the best things about Howmuch POS is that it supports multiple languages, including English, Urdu, and Arabic. It lets users easily understand the language and implement functionalities accordingly.

User-Friendly
Howmuch POS system allows users to concentrate on minor and significant aspects of business with better visibility and understanding.

Increase Efficiency
Howmuch point of sale software speeds up your services and allows you to complete all of your business operations in a short period of time.

Advanced Functionality
Howmuch is the best solution with powerful features allowing users to manage sales, orders, inventory, customers, suppliers, expenses, and multiple stores in their preferred language.



Multiple Payments Integration

Howmuch gives customers convenience by selecting the quickest and most effective method of accepting payment. With Howmuch, customers can quickly and easily make payments using a variety of payment methods, including PayPal, Moneris, Stripe, Jazz Cash, Easy Paisa, Credit Cards, Online Banking, and many more.

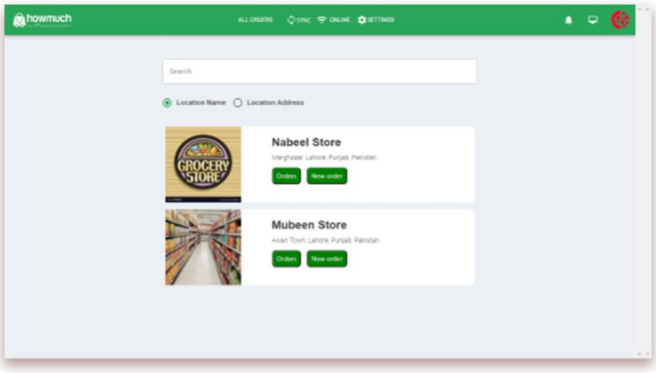
Real-time Management
When managing orders, the cashier pushes the order and gives the receipt to the customer regarding details. while orders and sales reports are synced to the manager's side for records.

Multiple Stores Management



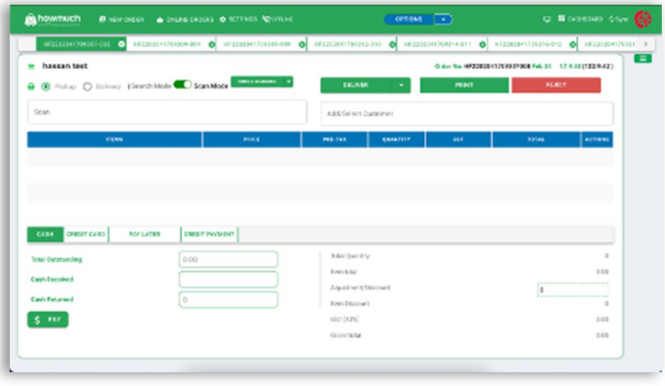
Howmuch POS has outstanding multiple outlets management ability. It is a reliable hosting system that allows users to sell in more places simultaneously, get accurate insight into your inventory in real-time, and avoid overselling.

Automate Operations
With Howmuch users do not have to perform operations manually because it automates your business operation and ultimately saves time and money.

Manage Chains Of Store
No matter how many locations you are operating your store, Howmuch point of sale software allows you to manage your chain of stores quickly.

Centralized Operations
This POS centralized all numerous stores to one location, i.e., your head location, and thus it gives you more opportunity for growth and development.

Advance Offline & Online Mode



Howmuch Point of Sale software has reliable and efficient offline and online functionality that allows the operator to keep on with their business operating continuously with seamless checkout and encrypted transaction without missing a single beat and once the Howmuch POS App regains the connection it automatically syncs all the order records.

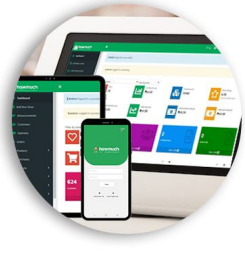
Keep Sales Processing

Howmuch POS offline mode keeps your retail store operation running smoothly even if the Internet isn't responding.

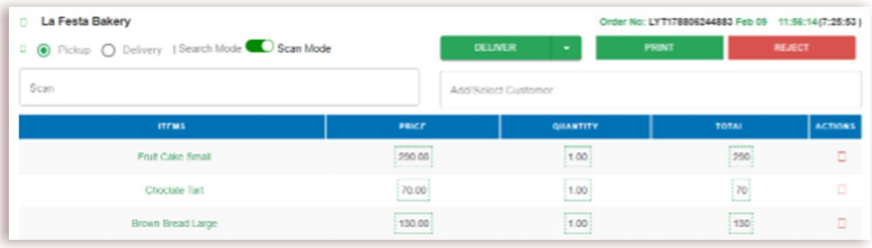
Mitigate Risk

Howmuch offline capability mitigates the risk to our businesses by pausing all business operations in case of a network outage.

Run Uninterrupted Information
In case of network or power outage, Howmuch conducts the sales and transactions and then automatically syncs up all the data when the system gets connected again.



Multiple Scan Modes (Barcode, IMEI)



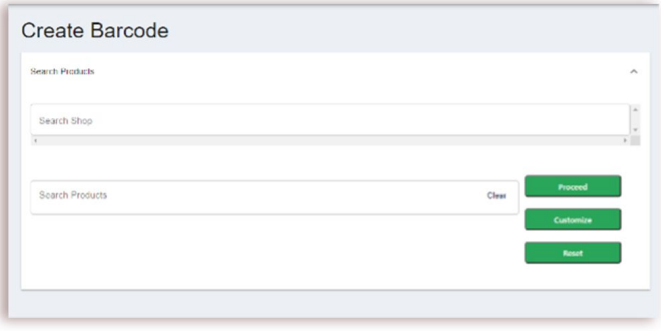
Howmuch also has scan functionality that makes it easier for a user to scan any item via barcode or IMEI and then search for its pricing details, manufacturers, and many more. Howmuch gives users an easy-to-manage experience. It allows users to quickly add products through scan mode.

Fast Navigation
Howmuch gives users a fast navigation users just enter the name of the product and get details of the product, its price, place, and every minor and major information within seconds.

Search Product In Inventory
Howmuch enables you to scan an entire inventory at once, access vital product information, and learn specifics about stock availability.

Fast Operations
Howmuch POS saves a lot of time because the staff does not have to search manually any product, they can perform it automatically by scanning barcodes or searching with name.

Barcode Labeling And Printing Functionality



Howmuch POS offers users barcode labeling and printing functionality so they can quickly add and save the barcodes for their products. Manually entering all the product information for a large-scale retail store is very time-consuming and difficult. However, Howmuch barcode labeling quickly adds the information about your product to your point of sale, saving you a ton of time.

Increase Automation

Howmuch barcode labeling functionality gives small business owners the tools to customize pricing labels, tracking outgoing products and packages on the shelf.

Create Scannable Barcode

Howmuch's point of sale software is suggested as the top barcode labeling program for creating scannable barcodes for products.
